

---

*For the attention of designers and employees of engineering services.*

*Dear Sirs!*

Company F&F GmbH was founded in 1992 in St. Petersburg. Currently company have more than 20 specialists in 3 regions of Russia: North-Western, Volga, Siberia.

Headquarter located in St. Petersburg. Besides supplying equipment, the company is engaged in designing a new drive systems and modernizing existing ones. Company have extensive experience in developing a drive systems in the pulp and paper, chemical, mining, power and other industries.

F&F GmbH is the official solution partner of SIEMENS in Russia, by FLENDER mechanical drives; official representative of SCHAEFFLER by bearing products and GEWES by cardan shafts Areas of the company - engineering and marketing of drive technology and bearing products.

---

FLENDER have been one of the leading manufacturers of drive technology in the world, having worked on the market for more than 100 years. Currently, this drive technology is available under the brand SIEMENS. The product range includes all the components of the transmission:

- geared motors: helical, bevel and worm capacity from 0.12 to 160 kW;
- gears: helical, bevel-helical, planetary, shaft mounted; turbo-gearboxes to drive steam, gas and hydro turbines; serial and special gears for industry-specific solutions; transmitted torque to 10,000,000 Nm;
- asynchronous three-phase motors of low and high voltage with squirrel and slip-ring motors, explosion-proof and standard design, capacity from 0.5 to 8000 kW;
- frequency converters to regulate the speed of the drive in the power range from 0.4 to 6,000 kW;
- three-phase asynchronous generators of low and high voltage, explosion-proof and without, capacity from 10 to 6000 kW;
- couplings: fluid, flexible, rigid, all-steel, coupling, launchers, special; transmitted torques up to 10 000 000 Nm;

SCHAEFFLER, which owns brands INA and FAG, develops and manufactures high-quality products that are designed for use in all areas of technology related to movement. Proposed solutions provide efficient and reliable operation all components of the drive. The product range includes:

- rolling bearings: roller, ball, needle, track, bearing for screw drives, insert bearings housing units, bearing housings;
- plain bearings;
- linear guide bearings with recirculating ball bearing or roller
- tool: Hydraulic for mounting and dismounting equipment, to calibrate equipment;
- induction heaters.

GEWES - one of Europe's leading manufacturers of cardan shafts, general and specific types, and connecting elements for them.

*Best regards*

*Lazarchuk Roman*

*Director of F&F GmbH*
